(1) Describe the purpose of this DoD information system or electronic collection and briefly describe the types of personal information about individuals collected in the system.

The objective of ARMYFIT is to provide an information technology platform to support the Comprehensive Soldier and Family Fitness (CSF2) program. The web-based software application provides a comprehensive data collection and reporting capability designed to measure, track, and assess comprehensive fitness of all U.S. Army Soldiers (Active, Reserves and National Guard), beginning at recruitment, with reassessments at appropriate intervals continuing through transition or retirement. This capability also extends to Family members and DA Civilians. ARMYFIT operates the Global Assessment Tool (GAT), an online survey based instrument used to assess the dimensions of emotional, spiritual, social, physical and family fitness. ARMYFIT also makes self-development training available with Comprehensive Resilience Modules (CRMs). A management system tracks required and completed course work.

ARMYFIT collects personal, educational, military, and medical information.

(2) Briefly describe the privacy risks associated with the PII collected and how these risks are addressed to safeguard privacy.

The associated privacy risks with the PII collection are interception of transmitted data and unauthorized database access. Appropriate safeguards are in place for the collection and use of information, and we believe the risk to individuals' privacy to be minimal. The system operates in a secure facility. Information assurance and security awareness training is administered at in-processing and on an annual basis. Access to data is restricted to individuals authorized access to the system as stated in the governing Privacy Act system notice. The Common Access Card (CAC) login is enforced. Triple-DES level encryption is employed for data at rest. Hypertext Transfer Protocol Secure (HTTPS) is used with the Secure Sockets Layer (SSL) protocol for data in transit. Secure FTP(SFTP) is used for the transfer of data from other systems. ARMYFIT is an Installation Campus Network (ICAN) Tenant in Good Standing of the Army Analytics Group (AAG), its hosting environment. The environment is certified and accredited by the DoD Information Assurance Certification and Accreditation Process (DIACAP).
