g. Summary of DoD information system or electronic collection. Answers to these questions should be consistent with security guidelines for release of information to the public.

(1) Describe the purpose of this DoD information system or electronic collection and briefly describe the types of personal information about individuals collected in the system.

ARIMS is the Army's centralized system for the identification, collection, and preservation of long-term electronic and hard copy records. The Secretary of the Army directed that ARIMS be used to preserve, protect and retrieve Army records to ensure compliance with governing statutes (44 USC and 36 CFR), DoD directives (DoD 5015.2), Army Regulations (AR-25-1 and AR 25-400-2) and other lawful purposes. PII in ARIMS consists of personal information contained on individuals in a variety of record copies pertaining to diverse subject matter as well as user names and account information. ARIMS is comprised of multiple business applications including the Freedom of Information Act Case Tracking System (FACTS) which is used to record the receipt and processing of FOIA and Privacy requests, Army Declassification Automated Management System (ADAMS) which is used to record documents that are being reviewed for declassification IAW EO 13526; JSRRC Claims Automated Processing System (JCAPS) which is used to manage research of requests received from veterans in support of disability compensation claims based on the Army's responsibility as the Executive Agent; Digital Asset Finder (DAF) which is a document storage and retrieval system.

The type of PII is personal, military, educational, financial, and medical information.

(2) Briefly describe the privacy risks associated with the PII collected and how these risks are addressed to safeguard privacy.

Records in the system and registered user account profiles are only available to responsible records officials and system administrators. ARIMS users are authenticated by Army Knowledge Online (AKO) and CAC Login for access to the system.

Due to the level of safeguarding, we believe the risk to individuals' privacy to be minimal. The risk associated with providing an individual the opportunity to object or consent is that the individual's personal information cannot be maintained, updated, or verified.
