f. Authority to collect information. A Federal law, Executive Order of the President (EO), or DoD requirement must authorize the collection and maintenance of a system of records.

(1) If this system has a Privacy Act SORN, the authorities in this PIA and the existing Privacy Act SORN should be the same.

(2) Cite the authority for this DoD information system or electronic collection to collect, use, maintain and/or disseminate PII. (If multiple authorities are cited, provide all that apply.)

(a) Whenever possible, cite the specific provisions of the statute and/or EO that authorizes the operation of the system and the collection of PII.

(b) If a specific statute or EO does not exist, determine if an indirect statutory authority can be cited. An indirect authority may be cited if the authority requires the operation or administration of a program, the execution of which will require the collection and maintenance of a system of records.

g. Summary of DoD information system or electronic collection. Answers to these questions should be consistent with security guidelines for release of information to the public.

(1) Describe the purpose of this DoD information system or electronic collection and briefly describe the types of personal information about individuals collected in the system.

The Automated Orders and Resource System (AORS) provides an automated tool to produce various types of order formats; costs training orders as they are produced; provides a procedure for amending and revoking orders; provides user maintainable online tables and requests for orders; provides procedures for various order formats and local order printing capability; and provides procedures for maintaining Reserve Personnel, Army (RPA) accounts and an online checkbook that is used to reconcile Standard Financial System (STANFINS) data. The AORS system produces orders based on time sequences and input requests from functional users and personnel managers. Types of orders produced include training, assignment, appointment, Active Duty Operational Support (ADOS), ADOS-Reserve Component, discharge, attachment, release from attachment, medical, mobilization, temporary duty, Uniform Code of Military Justice, and Sanctuary orders. Fund control for RPA accounts, including miscellaneous obligation documents, is centrally managed within AORS. Checkbooks are reconciled with STANFINS, maintaining a complete history of obligation adjustments and disbursements.

PII collected includes personal, contact, medical, employment, education, and military record data.

(2) Briefly describe the privacy risks associated with the PII collected and how these risks are addressed to safeguard privacy.

All systems and environments have threats that seek to exploit and cause harm to the information. Some threats are natural, some are inherent in the system design, some can be attributed to unauthorized personnel, and some to authorized personnel who make mistakes. Four general categories of threats exist: human-intentional, human-unintentional, structural, and natural. The system is maintained in a controlled facility. Appropriate technical, personnel, physical and operational safeguards are in place for the access, collection, use and protection of information. Due to the level of safeguarding, we believe the risk to individuals' privacy to be minimal.
