b. If "No," ensure that DITPR or the authoritative database that updates DITPR is annotated for the reason(s) why a PIA is not required. If the DoD information system or electronic collection is not in DITPR, ensure that the reason(s) are recorded in appropriate documentation.

c. If "Yes," then a PIA is required. Proceed to Section 2.

**SECTION 2: PIA SUMMARY INFORMATION**

a. Why is this PIA being created or updated? Choose one:

- New DoD Information System
- Existing DoD Information System
- Significantly Modified DoD Information System
- New Electronic Collection
- Existing Electronic Collection

b. Is this DoD information system registered in the DITPR or the DoD Secret Internet Protocol Router Network (SIPRNET) IT Registry?

- Yes, DITPR      Enter DITPR System Identification Number

**g. Summary of DoD information system or electronic collection. Answers to these questions should be consistent with security guidelines for release of information to the public.**

(1) Describe the purpose of this DoD information system or electronic collection and briefly describe the types of personal information about individuals collected in the system.

The purpose of the Civilian Human Resources (CHR) Regional Reports system is to provide the infrastructure required to support an enterprise solution for the Civilian Human Resource Agency's (CHRA's) regional reporting requirements. This system consolidates the report writing efforts, makes the reports available to all CHRA Regions, enables the use of a standard user interface for all CHRA reports, and ensures that all reports pull from the same enterprise data source. The data source used is data imported from a nightly refresh of DCPDS data pulled through an interface with the Tier 1 and Tier 2 databases hosted by the Army Civilian Data Center (ACDC). The type of personal information captured in the system is names and employee information.

(2) Briefly describe the privacy risks associated with the PII collected and how these risks are addressed to safeguard privacy.

Internal and external risks are associated with the protection of PII; however, risks are minimized to an acceptable level. Safeguards, such as network firewalls, software and hardware based intrusion detection, encryption, and best business practices for web development and database management are employed to detect and minimize unauthorized disclosure, modification, and/or destruction of data; thus we believe the risk to the individual's privacy to be minimal.

**h. With whom will the PII be shared through data exchange, both within your DoD Component and outside your Component (e.g., other DoD Components, Federal Agencies)? Indicate all that apply.**
