- (1) Describe the purpose of this DoD information system or electronic collection and briefly describe the types of personal information about individuals collected in the system.

TOPMIS II supports officer personnel management at HRC and at officer requisition activities worldwide by providing career and personnel managers with online computer support to assist them in the distribution and assignment of officers throughout the world. The system also provides web-based Officer Record Brief applications. PII collected by the system includes identification and contact data, dependent data, medical information, employment information, education data, and extracts from military records.

- (2) Briefly describe the privacy risks associated with the PII collected and how these risks are addressed to safeguard privacy.

All systems and environments have threats that seek to exploit and cause harm to the information. Some threats are natural, some are inherent in the system design, some can be attributed to unauthorized personnel, and some to authorized personnel who make mistakes. Four general categories of threats exist: human-intentional, human-unintentional, structural, and natural. The system is maintained in a controlled facility. Appropriate technical, personnel, physical and operational safeguards are in place for the access, collection, use and protection of information. Due to the level of safeguarding, we believe the risk to individuals' privacy to be minimal.
