Army Cadet Portal (CP) is a self-service application that allows cadets to apply for training and language courses on-line. It enables battalion staffs to identify and input university courses for US Army Cadet Command approval and to recommend cadets for attendance. It also enables headquarters staff to track allocations and conduct order of merit for selection. CP also includes a Partnership for Youth Success reservation module.

Types of PII collected include personal information; contact information; and education information.

(2) Briefly describe the privacy risks associated with the PII collected and how these risks are addressed to safeguard privacy.

All systems and environments have threats that seek to exploit and cause harm to the information. Some threats are natural, some are inherent in the system design, some can be attributed to unauthorized personnel, and some to authorized personnel who make mistakes. Four general categories of threats exist: human-intentional, human-unintentional, structural, and natural. The system is maintained in a controlled facility. Appropriate technical, personnel, physical and operational safeguards are in place for the access, collection, use and protection of information. Due to the level of safeguarding, we believe the risk to individuals' privacy to be minimal.
