(1) Describe the purpose of this DoD information system or electronic collection and briefly describe the types of personal information about individuals collected in the system.

CEALS is a collection of systems that integrates and coordinates critical legal resources gathered and produced by Corps legal offices worldwide and by private vendors. CEALS consists of the "CorpsLaw" intranet, the Matter Tracking System and contracts for on-line legal research (on-line law libraries). This is the system that is used to research and identify legal requirements and authorities relied on by USACE. CEALS provides a ready reference of information regarding Corps legal cases, decisions, precedence, policy, and the Corps' unique Civil Works mission. By making this information available to all Corps managing and staff attorneys, CEALS promotes uniformity in the application of legal principles throughout the Corps.
CEALS Contains the names and contact information of participants in legal matters to include (Name, Phone #, Address) for both employees of the United States Government and Attorneys representing members of the public.

(2) Briefly describe the privacy risks associated with the PII collected and how these risks are addressed to safeguard privacy.

The risk to individuals' privacy is minimal. Electronic and paper records are maintained in controlled areas accessible only to authorized legal office personnel. Physical security differs from site to site, but the automated records are maintained in controlled areas accessible only by authorized personnel. Access to electronic records is restricted by use of common access cards (CACs) and is accessible only by users with an authorized account. The system and electronic backups are maintained in controlled facilities that employ physical restrictions and safeguards such as security guards, identification badges, key cards, and locks.
